

# **Triangulating Novel Mixed-Method Educational Data for Effective, Evidence-Informed Policy Impact**

**Prof Catherine M. Lido, Dr Phil Mason & Dr Emma Seddon**

**Urban Big Data Centre**

JOINTLY FUNDED BY

**University  
of Glasgow**

# In this session we will discuss

Data Triangulation & Impact for Knowledge exchange & Policy Change through 3 UBDC case studies:

- EX 1 iMCD open data product
  - Novel data linkages & regression
  - GIS mapping &
  - Searchable Twitter dashboards
- EX 2 Gendered Journeys (inequalities in STEM)
  - Secondary data
  - Motivational interviews
  - Digital Footprints & Social network analysis
- EX 3 Social enterprise partnerships (Food Train for older adults)
  - Secondary data
  - Surveys &
  - Lived experience Interviews

# Who am I?

**Lifewide learning in the city: novel big data approaches to exploring learning with large-scale surveys, GPS, and social media**

Catherine Lido, Kate Reid and Michael Osborne

- Social Psychologist- Prof of Lifelong Learning
- Social Identity & Social Capital frames
- City Information Modelling approaches &
- Mixed-methodologies
- To explore Learning Inclusion

#### KEYWORDS

Lifelong learning; lifewide literacies; informal learning; widening participation; big data; inclusion; Learning Cities

ities agenda, which argues for the promote education across all sectors. The evaluative research on Learning Cities naturalistic and empirically rigorous adult learning in urban contexts is provides a case study of informal learning amongst Glaswegian adults using big data collection: a household survey exploring attitudes, behaviours, and literacy around the city; and the capture of social media. The work operationalises and explores domains beyond education, previously been considered in surveys of physical mobilities and transportation concepts of social identity and capital analytical frameworks of marginalisation of informal learning using multi-analysis of city-wide participation demographic picture of groups mar-

# What is the Urban Big Data Centre?

[ubdc.ac.uk](http://ubdc.ac.uk)

[@urbanbigdata](https://twitter.com/urbanbigdata)

- Promotes use of big/ novel data & innovative research methods to improve social, economic & environmental well-being in cities
- Through:
  - Data Collections & Data Services
  - Data Science Teaching & Capacity Building
  - World-leading & **IMPACTFUL** Urban Research
- Jointly funded Research Centre- ESRC & University of Glasgow

# Educational Disadvantage & Place (UBDC)

# Blurring the Qual/ Quant Divide

Lido & Osborne, 2015; Lido et al. 2018; 2020

- Big Data- The various 'Vs' (Eynon, 2013)

- Volume
- Velocity
- Variety (Value & Veracity)

- Existing/ Naturalistic data- S

- Novel/ Innovative data- Soci

- Qualitative data- Experientia

Blurring the Boundaries- Symp

*Big Data may be numerically large or beyond the capacity of most relational database systems to manage. More significantly, it may be continuous (in real-time) with ongoing data collection, or it may be 'big' due to the complexity of the data themselves and the need for novel methods to capture, analyse, interpret and visualise. Data-sets are becoming bigger and more open, and it is important to tap into such resources to improve our knowledge of city-wide participation.*

*(Lido et al. 2015, p. 494)*

# Triangulation

- ‘Comparing findings from > one perspective
- Multi-methods (within a paradigm)
- **Mixed-methods** (integrating paradigms)
  - Can be part quantitative – part qualitative
  - Experiment and survey (multiple-methods)
  - Survey and interview (mixed-methods)
- Secondary data as contextual
- One researcher with another...

# Project Ex 1: Integrated Multimedia City Data (**iMCD**)

2015 project designed to address themes of **urban living**

Based in the Greater Glasgow region (1.2m population)

Integrates multi-mode data: person-level self-reported and sensed information, linkable to external data sources

A Big Data project, especially because of the ***variety*** of its data strands

Education research perspective:

- Attitudes, Literacies & Behaviours

  - Education/ skills

  - Sustainability

  - Transport

  - Cultural/ civic activity and engagement

  - ICT/ technology use

**Household Survey** 2095 people / 1511 households

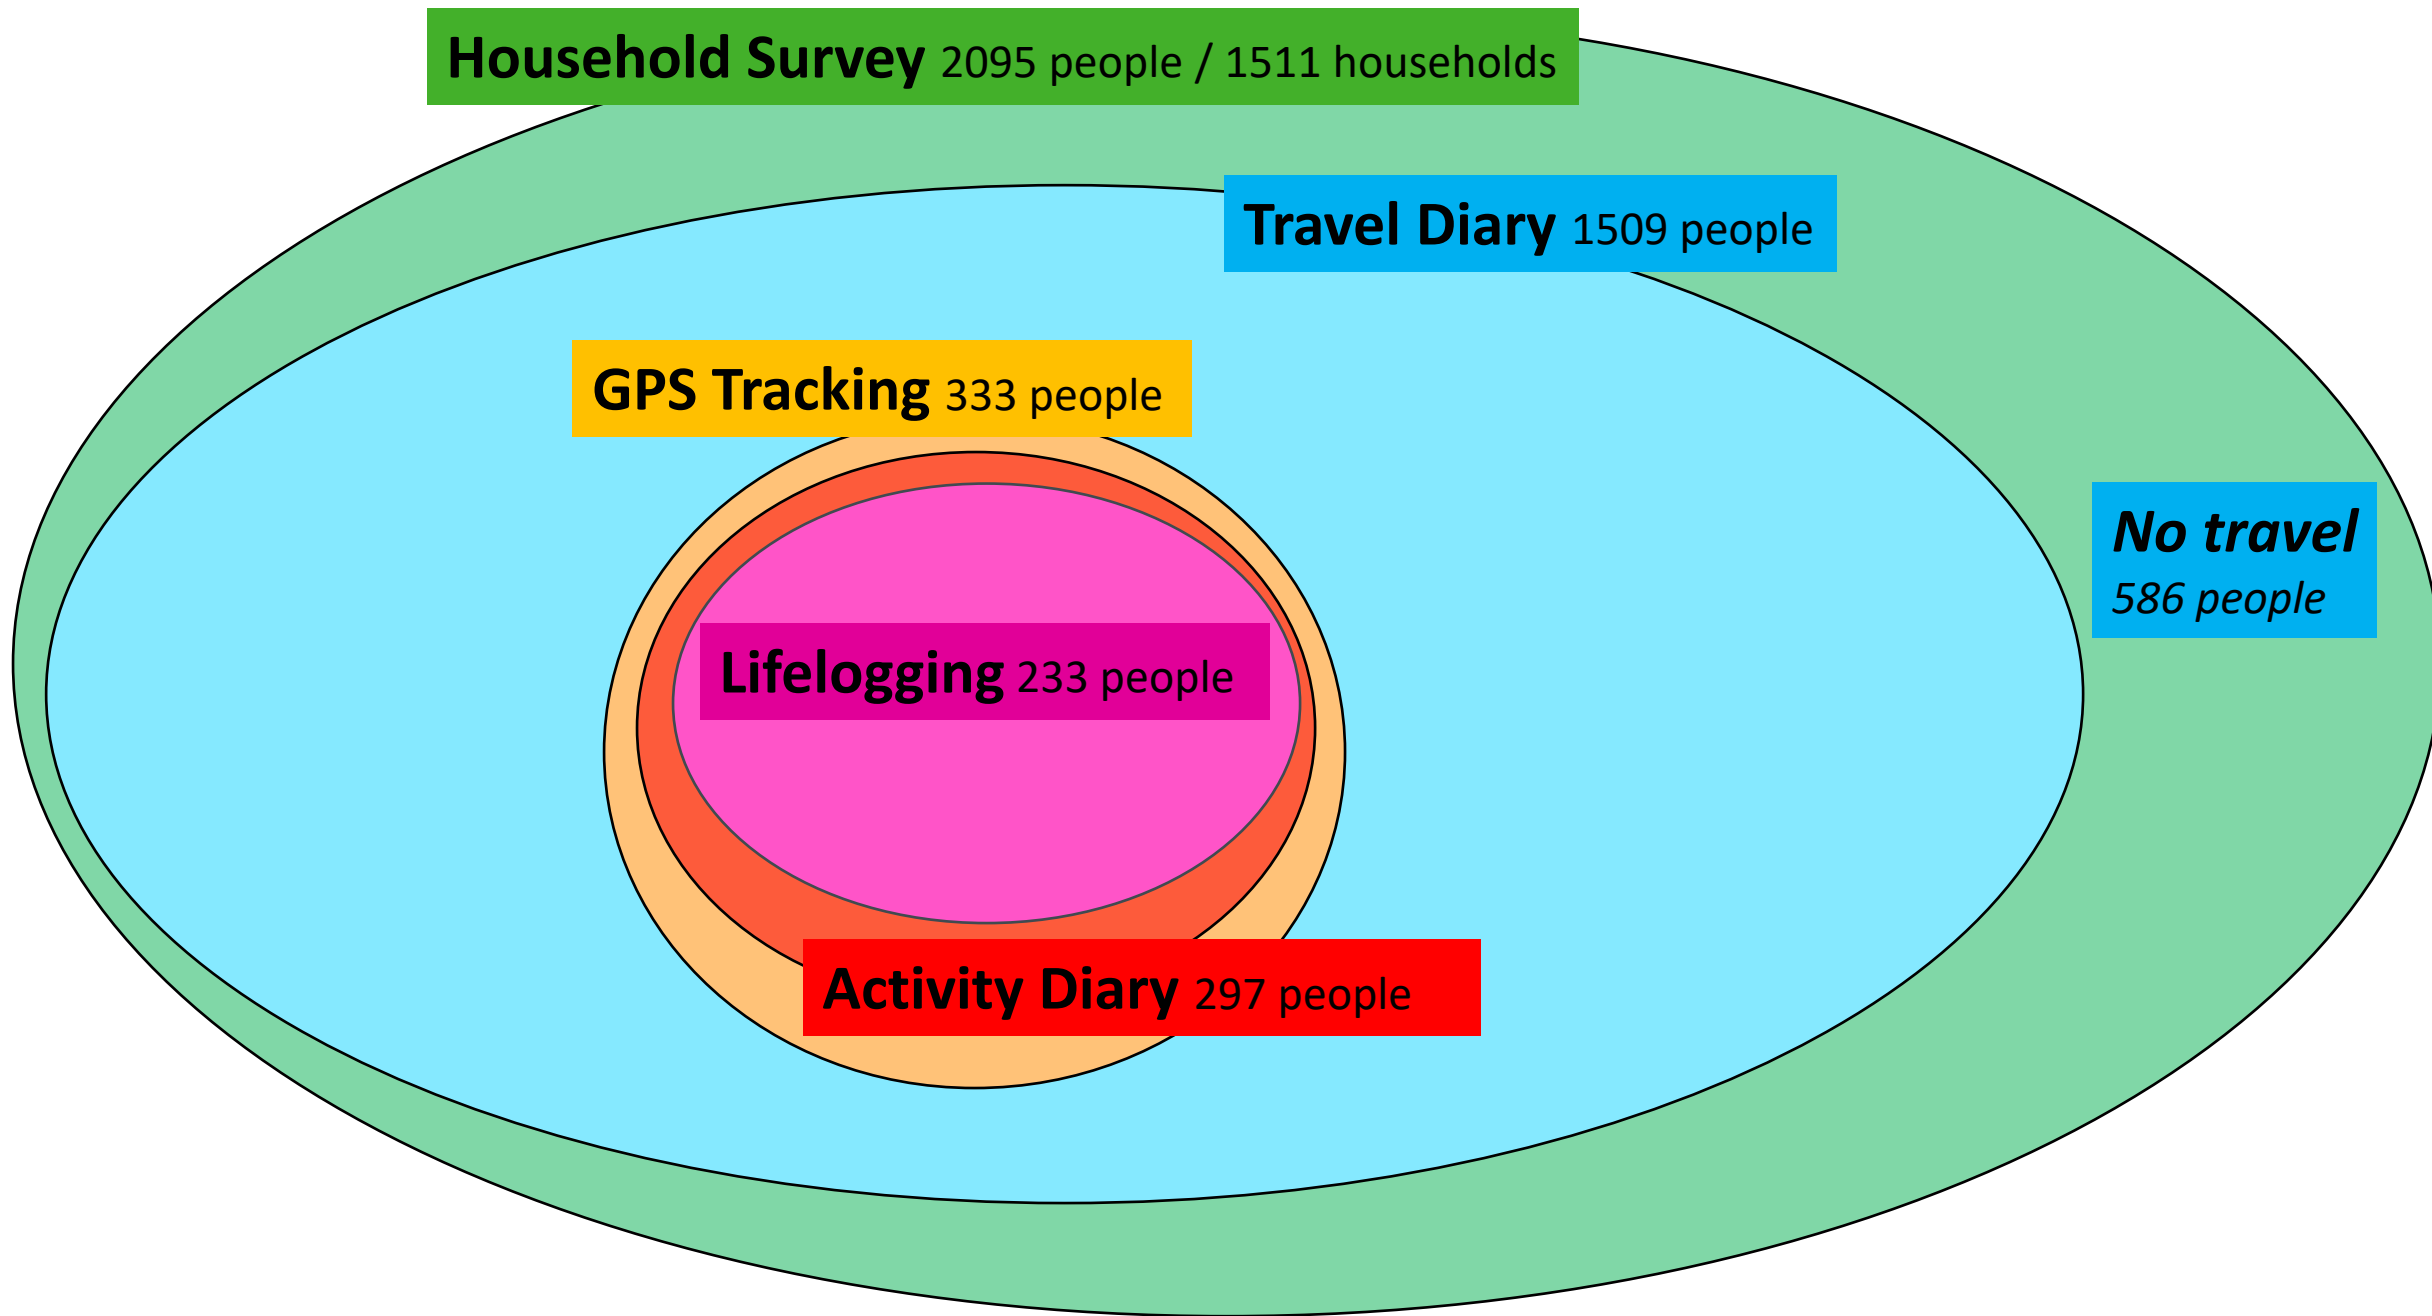

**Travel Diary** 1509 people

**GPS Tracking** 333 people

**Lifelogging** 233 people

**Activity Diary** 297 people

**No travel**  
586 people

iMCD

## Social Media

64m tweets

Household Survey

Travel Diary

GPS Tracking

Lifelogging

Activity Diary

## Secondary / Administrative Data

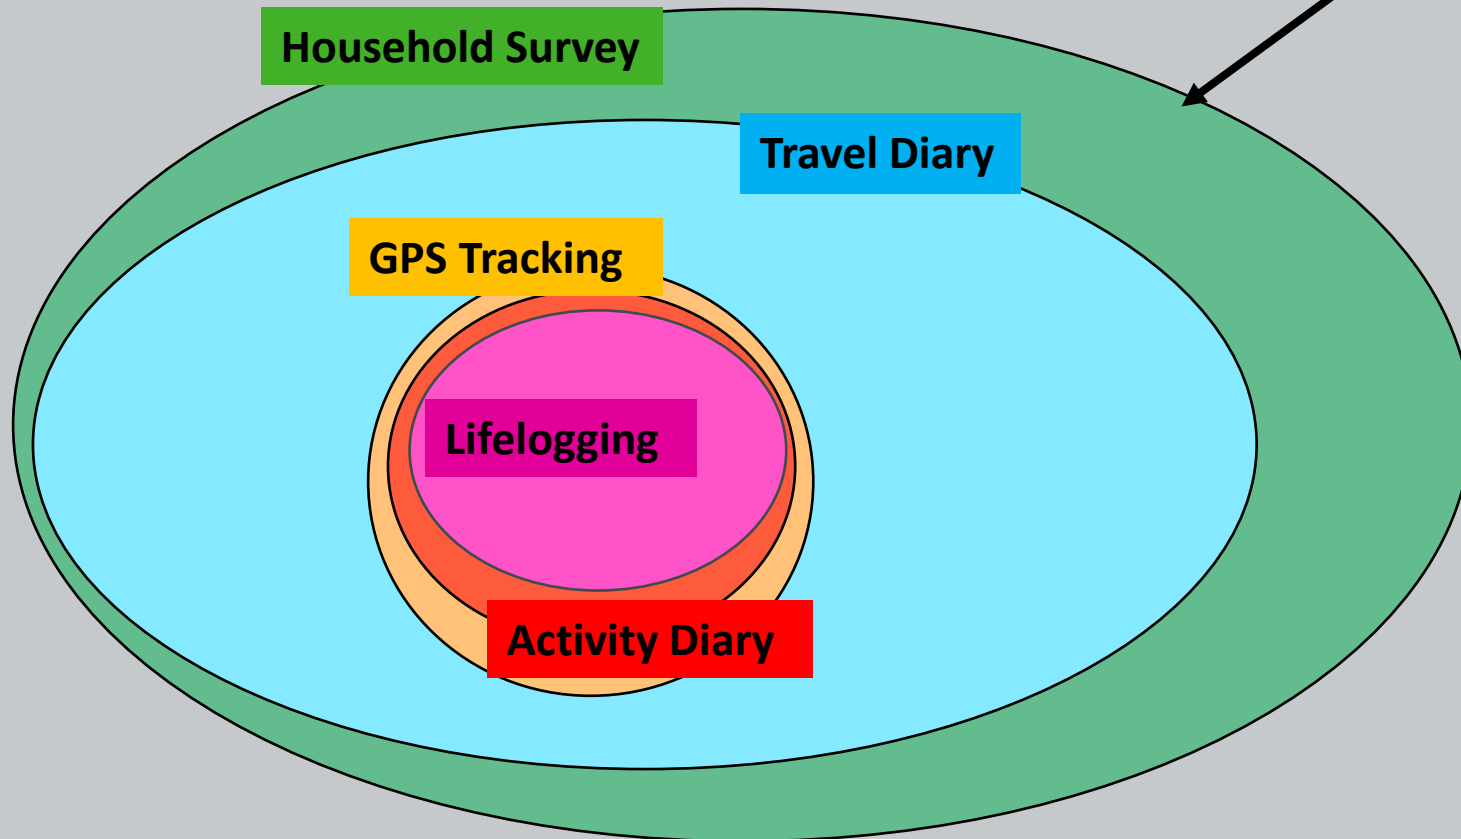

Linked at data zone/postcode unit level

### Neighbourhood deprivation

Scottish Index of Multiple Deprivation

### Access to urban greenspace

OS Open Greenspace & Open Street Map

# Learning engagement, walking and greenspace

Learning: formal (for qualification), non-formal (not for qualification), informal (independent)

Deprivation: SIMD quintile

Greenspace access: within 10 min walk of e.g., parks, sports grounds, children's play areas

## Trying to understand complex patterns

### 1) Household Survey:

Learning engagement is more likely if you live near greenspace (OR=1.27–2.16)

### 2) Household Survey + Travel Diary + GPS tracks:

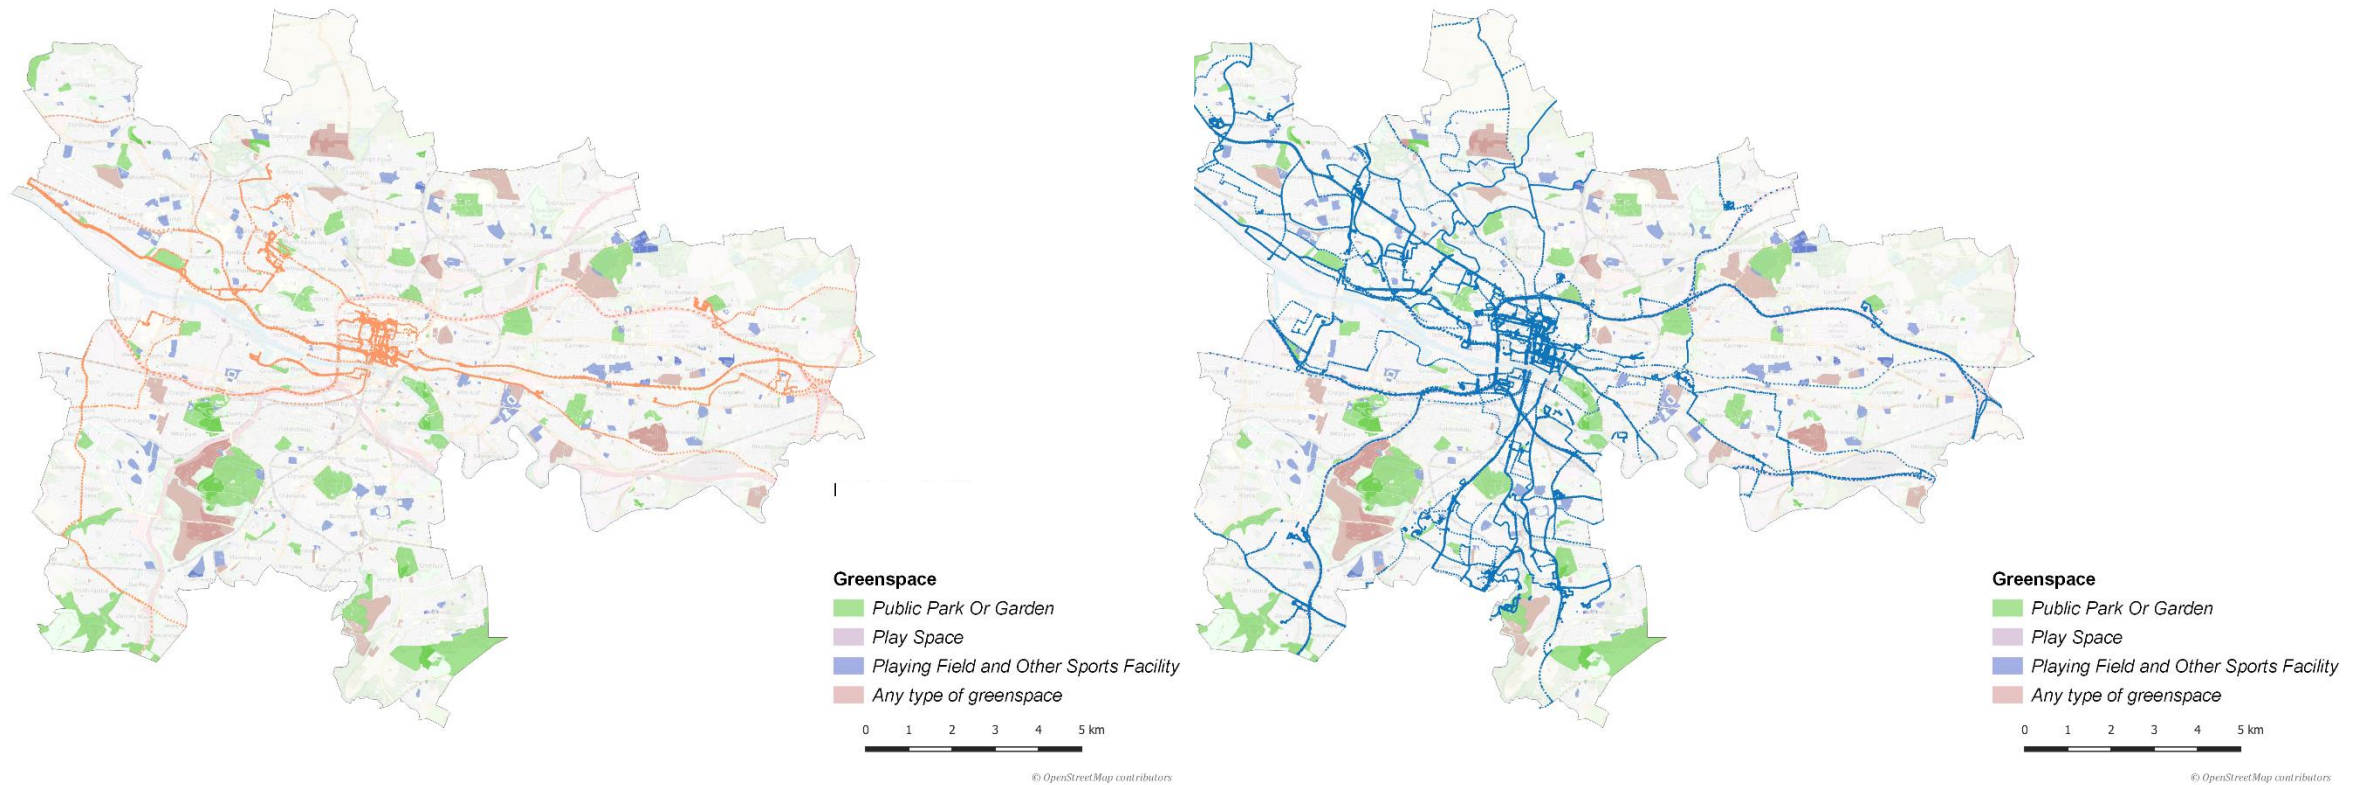

Learning engaged people generally walk more often (OR=1.68, 5-7 days per week)  
and for longer (21.4 vs 16.4 min), but not significantly so in greenspace

### 3) GPS tracks:

Qualitative illustration. Maybe learning-engaged older women walk less in greenspace (more in the city centre) than the non-learning-engaged?

## All-mobility patterns of learning-engaged (left) and non-learning-engaged (right) women aged 60+ years

### 3) GPS tracks:

Qualitative illustration. Maybe learning-engaged older women walk less in greenspace (more in the city centre) than the non-learning-engaged?

# iMCD IMPACT- Movement Patterns

- Understanding Sedentary Patterns of Seniors (Shaw et al 2017)
- Lifelong Learning with Greenspace (Lido et al. 2020)

**Is this 'Impactful' & How can we capture outcomes in communities?**

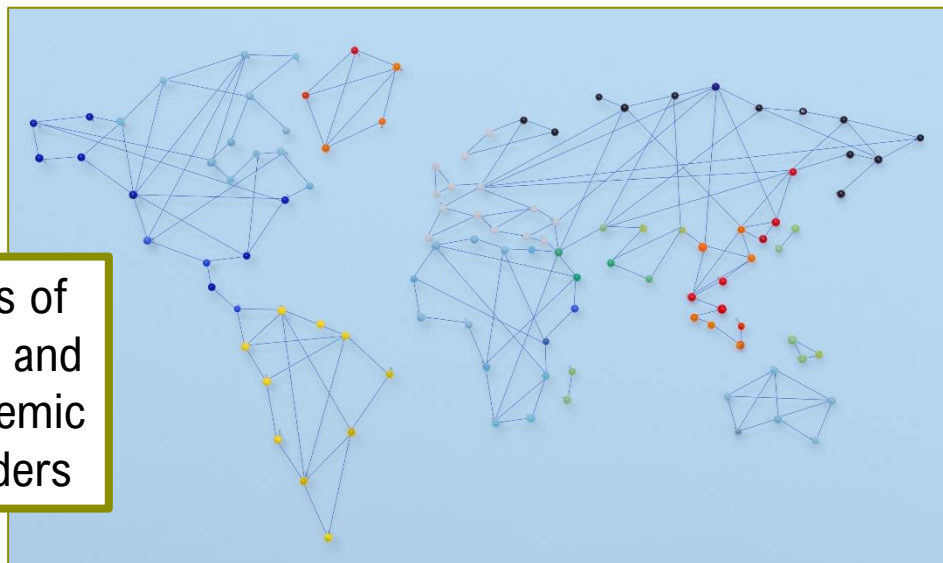

# GENDERED JOURNEYS

## *Trajectories of STEM students and graduates through higher education and into employment, in India, Rwanda and the UK*

- Mixed methods:
  - large-scale survey
  - secondary data analysis
  - interviews and focus groups
- Stakeholders in different countries and institution types:
  - universities
  - private and public STEM employers
  - state-level organisations
- International research for global impact:
  - national policy change
  - 'toolkit' for students, HEIs and employers in all contexts
- Broader impact = contribution to meeting sustainable development goals (SDGs 4, 5, 8, 9)

Networks of  
academic and  
non-academic  
stakeholders

STEM Gendered Journeys  
@STEM\_journeys

Register now for our event in the lead up to [#COP26](#) on gender and sustainability in the global south. Featuring [@Iraba\\_Lydie](#) from Rwanda, [@Aparna\\_R1](#) from India and three other speakers! [@CRADALLGlasgow](#) [@UrbanBigData](#) [@UofGEducation](#) [#womeninstem](#) [eventbrite.co.uk/e/gender-susta...](#)

**Gender, sustainability and research capacity  
building in the Global South**

**Thu, 28 October 2021  
13:00 – 15:00 BST**

Why the world needs more female scientists! Panel event featuring speakers from the Global South discussing to what extent gender and sustainability relate to the wider development landscape and to building research capacity in these contexts.

# Findings: Relationship of Malnutrition Risk to Psycho-Social Wellbeing

Risks for Lower **Wellbeing** related to:

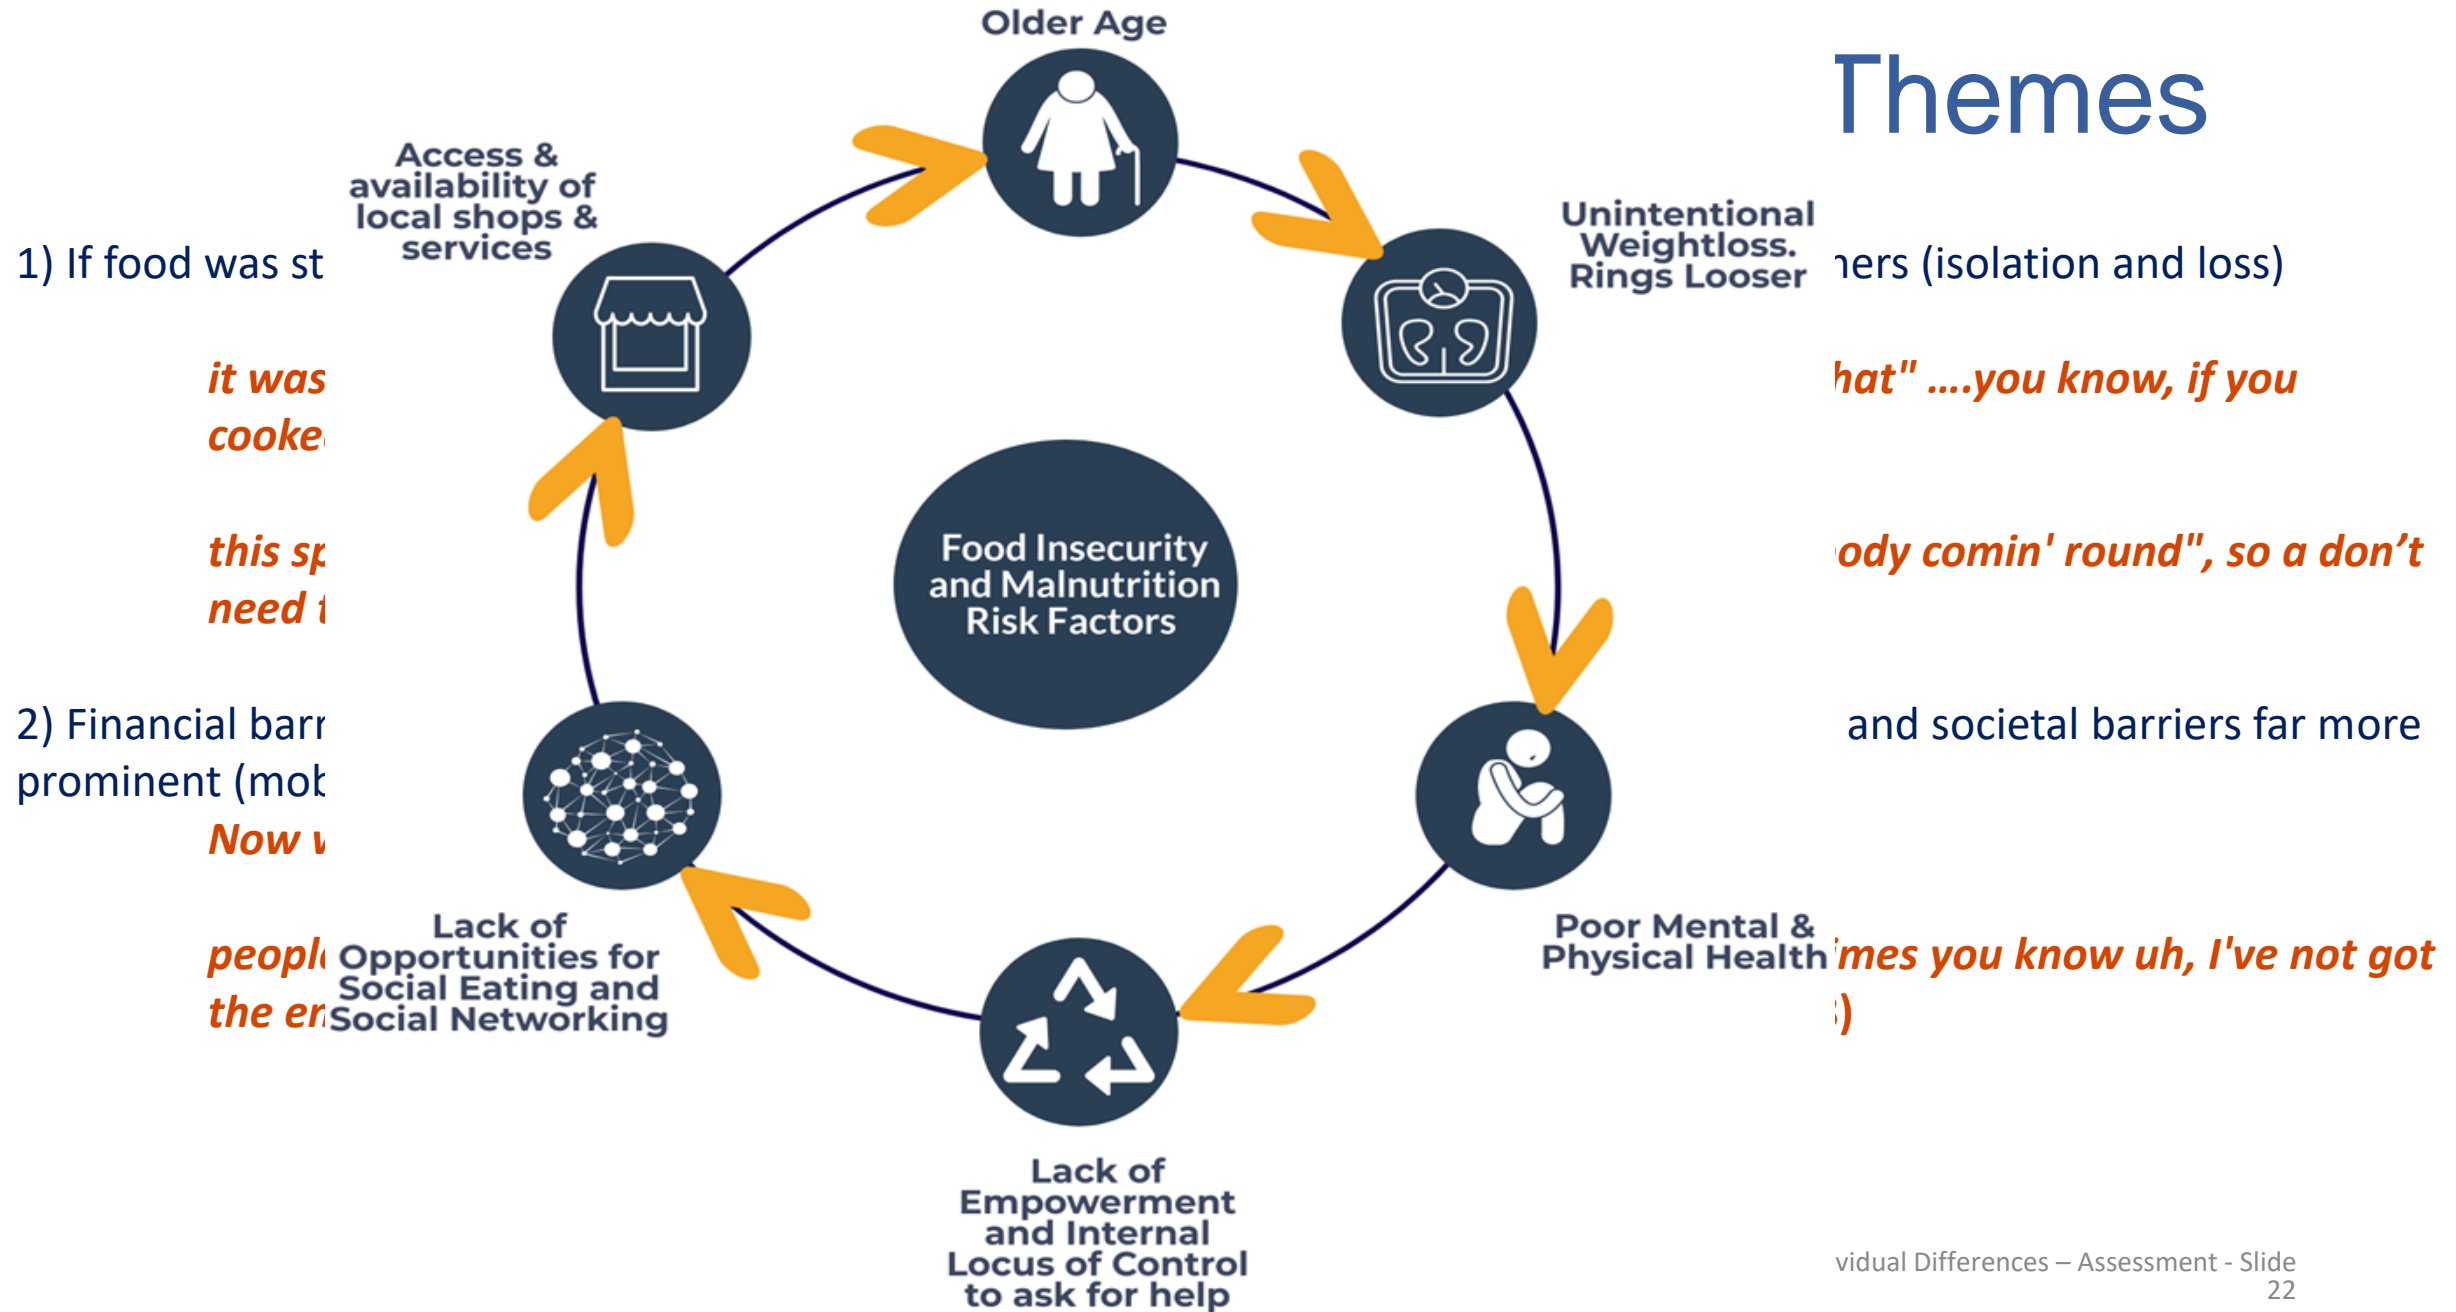

- Greater **Loneliness** reported ( $p < 0.001$ )
- Less reported **Social Support** (both variables  $p < 0.001$ )
- Higher levels of **Food Insecurity & Malnutrition Risk** (both moderately strong, & negative in direction  $p < 0.05$ )

**Malnutrition Risk** was related to:

- Greater **Food Insecurity**
- Greater **Loneliness**,
- Less reported **Social Support** (both measures),
- More **external locus of control** (all  $p < 0.05$ )

# Themes

# Data Lessons?

- Consider Novel/ Innovative Data (e.g. Social Media, Creative Methods)
- Blur Qual/ Quant Boundaries
- Close the Loop- from # & Lived Experiences to **Holistic Stories**
  - **Triangulation**
  - **Interdisciplinarity &**
  - **DIVERSE Impact/ KE**
- Note- Privacy tensions with open data (GDPR)
- ***Need citizens to WANT to engage, feel heard, be included in decisions***
- ***Need evidence to inform policy, but needs to ‘speak’ to diverse stakeholder needs***

# Can your research change the world?

## Impact Motivations?

- Social Justice?
- Policy Change?
- Including hard to reach populations?
- Is it being debated in policy?
- Is it topical in the press?
- Are there organisations who might benefit from your work?
- How can you reach out/connect?

## Policy-Maker Needs?

- Lacking in present evidence base- numbers? experiences?
- How has the issue progressed- in in discussions? In law?
- What are the most recent changes being considered?
- Have you contacted SPICE team? MPs? MSPs?
- What types of events might appeal to political and non-stakeholders?
- Executive summaries, policy briefs & briefing papers vs. Research summaries & articles?
- Tell the story with data

## Dissemination for Public?

- What are competing discourses & do they need challenged?
- What are main outlets for this topic? Twitter? News print?
- Can you reach out to contacts, journalists, organisations prolific on the topic?
- User-friendly language?
- Simple story (3 key messages)
- Get media savvy/ training
- Get social media savvy

- Question 1. What would make an impactful policy brief for your research? What would that look like?
- What would the goal of this document be?
- Where would you disseminate it?
- What images might accompany it?
- How would you know it was effective?

- Question 2. What would constitute impactful social media coverage of your research?
- What form would this output take? Content and target audience?
  - Where would you disseminate it?
  - How would you know it was effective?

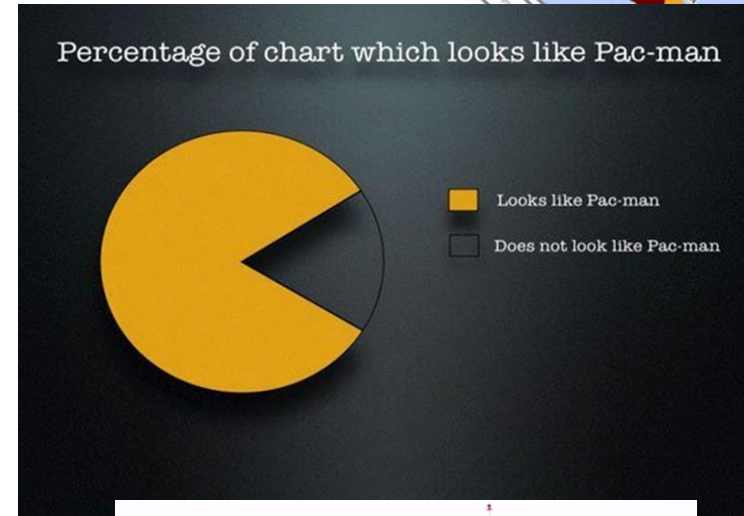

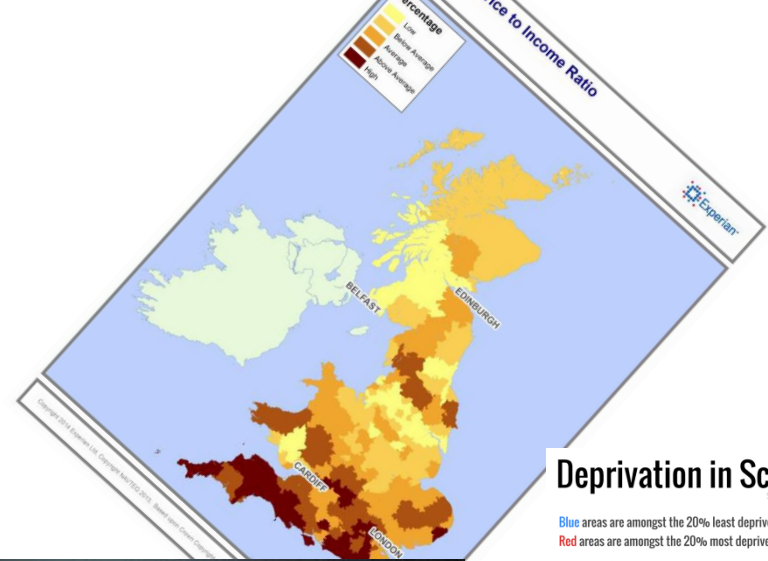

# Visualisations are powerful

❖ Visualisations key to communicating:

- Pie charts?
- Bar Graphs?
- Scatterplots?
- Violin plots
- 3-D models
- 'Heat maps'
- Social Networks...
